

CUSTOMER PORTAL BLUEPRINT

1. Architecture

API Gateway connects to Account Service and reads from User Database.

Account Service calls Mail Worker.

Mail Worker writes to Event Queue.

2. Functional requirements

REQ-001: Account Service shall register new accounts.

REQ-002: API Gateway should respond within 200 milliseconds.

REQ-003: User Database must encrypt personal data.

REQ-004: Mail Worker could send weekly summaries.

REQ-005: The system won't support anonymous purchases.

3. Constraints

The monthly budget must not exceed 500 dollars.

4. Assumptions

Assume the customer supplies an identity provider.

5. Open questions

TBD: data retention policy.

The deployment region is not yet decided.
